

## CLIMATE CONTROL / AIR CONDITIONING FOR WORKING DOG CARS

In warm, sunny weather cars become ovens and even if it is cloudy the temperature inside a car can become dangerously hot for your dog. When it is just 22°C (72°F) outside, the temperature inside can soar to 47°C (117°F), or even higher.

Eberspächer UK can offer air conditioning and climate control systems specifically developed for the Skoda Octavia and other cars and vans.

Automatic or manual control air conditioning (cooling only) is best suited for summer use. Fully automatic climate control provides all year round comfort and de-humidification.

The systems are extended from the original driver air conditioning, with the climate system benefiting from the addition of an independent 'Hydronic' water heater.

These systems will dramatically reduce the build-up of condensation within the rear of the vehicle, preventing problems with damp clothing, equipment and electrical failures caused by moisture ingress from condensation.

The climate system, producing up to 4.3kW of cooling and heating, will provide warm dry air in winter as well as summer, to rapidly dry dogs and equipment.

### Climate Control Kit for Skoda Octavia

Air Conditioning Kit – Part No. 81.1000.40.9159

Heater Kit – Part No. 29.2130.01.0098
