

AMBULANCE REFRIGERATOR AMBUTRONIC

ADVANTAGES:

- Low space requirement combined with a capacity of 7 l thanks to the extremely compact Secop BD Micro compressor
- Very stiff and robust design with sturdy stainless-steel frame
- Rigid structure for operation during emergency deployments
- Latching function for easy and secure closing of the refrigerator door
- Sealed digital control and display panel
- A visual and acoustic alarm is activated when the temperature exceeds or falls below the set temperature by more than 1.5 °C
- The cooling equipment or refrigerant circuit with compressor can be repositioned up to 1.5 m away, additionally allowing the unit to be mounted under, behind or next to the refrigerator
- Features an electronic thermostat and a pre-set temperature range of 4 °C (+/- 1.5 °C), as well as the option of setting a temperature range between 2 °C and 8 °C
- The door can be hinged on the left instead of the right
- For 12 V and 24 V operating voltage
- ECE certified (E-mark certificate)
