

Winter Fuel Savings

with Eberspächer

NEW 801 Series Digital Controller with Diagnostics

Waiting to load or unload or even taking a break with the engine idling to keep warm costs money and increases wear and tear on the engine.

Compare the cost of operating an Eberspächer Airtronic D2 in low heat at

£0.14 per hour to a 10 litre engine at £3.50 per hour. *

** Prices based on £1.40 per litre.*

Install an Airtronic Heater to:

- Save Fuel and Save Money
- Reduce Engine Wear
- Reduce Air Pollution
- Meet EU Anti-Idle Regulations
