

## A FLEXIBLE SOLUTION FOR VENDING MACHINE STOCKISTS

### THE CARRIAGE OF SMALL QUANTITIES OF TEMPERATURE CONTROLLED GOODS

Eberspächer are the European distributor for the innovative Coldtainer range of compressor driven insulated containers. These containers are ideal for those customers who want to transport a small quantity of chilled goods amongst a load of primarily ambient goods. This avoids the need for an expensive dedicated refrigerated van, which is both expensive to purchase and run.

The containers can operate off a 12V DC connection whilst in the van, and also operate from 230V AC mains supply in order to pre-chill the cabinet. There are models in a variety of sizes from 22 litres to 915 litres, but it is the 140 and 330 litre models that suit the vending machine industry best. These models are available in three different versions, **NDN** for chill operation only (down to 0°C), **FDN** for chill or freeze operation (down to -21°C) and **NDH** for chill or heated application (between 0°C and +30°C).

Containers can be shelf mounted, either at the rear of the vehicle or accessible through the side sliding door, or mounted on the floor. Eberspächer can supply a number of optional accessories including; mounting plates, wheeled trolley's and a variety of stainless steel catering equipment, especially designed to accept the standard 600 x 400 tray sizes.
